

To be a successful competitor in today’s dynamic manufacturing environment, you need a vision beyond the immediate needs of day-to-day operations to guide you. High-performance organizations know where they want to go and have an action plan to get there.

The NWMOC staff will assist you and your management team in analyzing your current business conditions and developing goals for the future. Along with NWMOC staff, you and your team will create a clear, shared direction for the organization and a detailed plan to get there.

Significant, sustainable business improvements are possible when your resources are focused on the “critical few” and everyone is aligned for success.

Assessment and Benchmarking tools provide a clear picture of how your business compares to other companies in your industry sector. The interactive Transformation Planner tool will allow for what-if scenario testing and project financial improvements for specific changes.

The Agenda

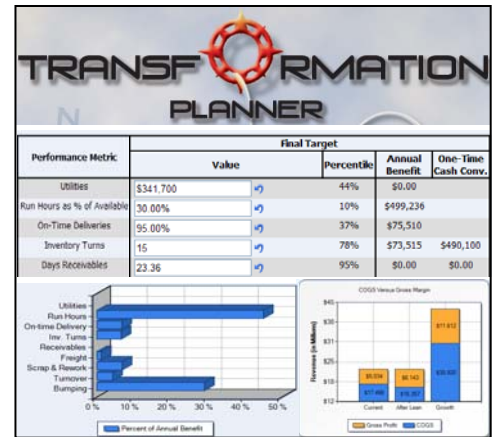

Preparation: Assessment, Input Data, Team Selection

Day 1: Assessment data, interactive benchmarking, understanding your competitive environment, developing key competitive priorities.

Day 2: Training in the best and most relevant improvement tools and strategies.

Day 3: Action planning, measures, deployment strategy. You are ready to go!

Follow-up: 85% of companies succeed in this process. We want you to be one of them!

- **Align improvement efforts with corporate strategy**
- **Focus the entire organization on a few critical goals**
- **Develop an effective deployment strategy throughout the organization**
- **Establish measures to track performance**
- **Increase productivity and profitability**
